VACCINE PROGRAM & REGULATIONS:

Malaysia will begin administering Pfizer's Covid-19 vaccine at the end of February, while the latest order would come throughout the year. Besides the arrangements with Pfizer, AstraZeneca and COVAX, Malaysia is still in active vaccine discussions with China-based Sinovac and CanSino Biologics, as well as Russia's Gamaleya Center. The Government will also procure enough vaccines to cover more than 83 per cent of the population. The vaccines will be provided free to Malaysians. The initial shipment will be reserved for front liners including health care workers, police, Army officials before being given to high-risk groups such as the elderly as well as those with non-communicable diseases and chronic respiratory disease.

- THERE'S no need for those who receive the first dose of the Covid-19 vaccine to be quarantined before receiving the second shot. But they will need to practise health standard operating procedures (SOPs) like wearing masks to avoid being exposed to the coronavirus before getting the second jab of the vaccine, says the Health Ministry.

- Transit and connecting flight passengers who do not require immigration clearance are allowed to board their connecting flights. They need to check with their airline to ensure their checked-in luggage is transferred to the connecting flight to reach the destination. Inter-terminal (KLIA-KLIA 2 or KLIA 2-KLIA) transit will not be possible during this period.
- Passengers are only allowed into the airport if they have a valid flight ticket or boarding pass, wearing a face mask and has a body temperature of less than 37.5c.
